			ata Sheet	
According to Annex	II to REACH	 Regulation 	(EU) 2020/878 and to Annex II to UK	REACH
SECTION 1. Identification of the s	ubstance	e/mixture	and of the company/unde	ertaking
1.1. Product identifier Code:	A0031			
Product name	TINTE	RAL		
Chemical name and synonym	VERNI	CE ALCHIDI	CA	
1.2. Relevant identified uses of the substance			rised against	
Intended use VERNICE ALCHIE	JICA IN AER	1050L		
1.3. Details of the supplier of the safety data sl	haat			
Name		Color Srl		
Full address	via Do	n Milani 15		
District and Country	20025 Italia	Legnano (Mi		
		24/570400		
		31/579100		
	Fax 03	31/579372		
e-mail address of the competent person				
responsible for the Safety Data Sheet	tecnic	o@talkencol	or.it	
1.4. Emergency telephone number	CENT		ENI di Milana Niguarda Tal 0266404	020
For urgent inquiries refer to	CENT		ENI dI Milano-Niguarda Tel 0266101	029
SECTION 2. Hazards identification	n			
	•			
2.1. Classification of the substance or mixture				
The product is classified as hazardous pursuant t	to the provis	ions set forth	n in (EC) Regulation 1272/2008 (CLF	P) (and subsequent amendments and
supplements). The product thus requires a safety da	atasheet that	complies with	h the provisions of (EU) Regulation 20	20/878.
Any additional information concerning the risks for h	nealth and/or	the environm	nent are given in sections 11 and 12 of	f this sheet.
Hazard classification and indication:				
Aerosol, category 1		H222	Extremely flammable aero	osol.
		H229	Pressurised container: ma	
Eye irritation, category 2		H319	Causes serious eye irritat	ion.
Skin irritation, category 2		H315	Causes skin irritation.	
Specific target organ toxicity - single exposure, ca	llegory 3	H336	May cause drowsiness or	dizziness.
2.2. Label elements				
Hazard labelling pursuant to EC Regulation 1272/20	008 (CLP) an	nd subsequen	t amondments and supplements	
	uucr) di	a subsequell		
<u> </u>				

Talken Color Srl	Revision nr. 13
	Dated 12/12/2023
A0031 - TINTE RAL	Printed on 16/01/2024
	Page n. 2/21
	Replaced revision:12 (Dated: 24/01/2023)

Hazard pictograms:

.

Signal words:	Danger
Hazard statements: H222	Extremely flammable aerosol.
H229	Pressurised container: may burst if heated.
H319	Causes serious eye irritation.
H315	Causes skin irritation.
H336	May cause drowsiness or dizziness.
Precautionary statements: P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P251	Do not pierce or burn, even after use.
P410+P412	Protect from sunlight. Do no expose to temperatures exceeding 50°C / 122°F.
P501	Dispose of contents in different containers for steel
P102	Keep out of reach of children.
P101	If medical advice is needed, have product container or label at hand.
P211	Do not spray on an open flame or other ignition source.
Contains:	ACETONE PROPAN-2-OL
	BUTAN-1-OL N-BUTYL ACETATE

2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage \geq than 0,1%.

The product does not contain substances with endocrine disrupting properties in concentration \geq 0.1%.

SECTION 3. Composition/information on ingredients

3.2. Mixtures

The full wording of hazard (H) ph	nrases is given in section	on 16 of the sheet.	
The product is an aerosol contai health hazards). The percentage	0.1	ne purposes of calculation of the health hazards, pro	opellants are not considered (unless they have

Percentage of propellants: 46,00 %

SECTION 4. First aid measures

4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

4.3. Indication of any immediate medical attention and special treatment needed

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE If overheated, aerosol cans can deform, explode and be propelled considerable distances. Put a protective helmet on before approaching the fire. Do not breathe combustion products.

A0031 - TINTE RAL

Revision nr. 13

Dated 12/12/2023

Printed on 16/01/2024 Page n. 5/21

Replaced revision:12 (Dated: 24/01/2023)

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site. Send away individuals who are not suitably equipped. Wear protective gloves / protective clothing / eye protection / face protection.

6.2. Environmental precautions

Do not disperse in the environment.

6.3. Methods and material for containment and cleaning up

Use inert absorbent material to soak up leaked product. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Avoid bunching of electrostatic charges. Do not spray on flames or incandescent bodies. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Do not eat, drink or smoke during use. Do not breathe spray.

7.2. Conditions for safe storage, including any incompatibilities

Store in a place where adequate ventilation is ensured, away from direct sunlight at a temperature below 50°C / 122°F, away from any combustion sources.

2-METHOXY-1-METHYLETHYL ACETATE Store in an inert atmosphere, sheletered from moisture because it hydrolises easily.

7.3. Specific end use(s)

Information not available

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

HAND PROTECTION None required.

SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

EYE PROTECTION

Wear airtight protective goggles (see standard EN ISO 16321).

RESPIRATORY PROTECTION

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. Use a mask with a type AX filter combined with a type P filter should be worn (see standard EN 14387).

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

SECTION 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

Properties Appearance	Value aerosol	Information
Colour	as showed in color folder	
Odour	carratteristico	
Melting point / freezing point	not available	
Initial boiling point	not applicable	
Flammability	non applicabile per aerosol

Relative vapour density	not available
Particle characteristics	not applicable

9.2. Other information

9.2.1. Information with regard to physical hazard classes

Information not available

9.2.2. Other safety characteristics	
VOC (Directive 2010/75/EU)	89,41 % - 659,86 g/litre
Explosive properties	durante l'uso puo' formare con l'aria miscele esplosive o infiammabili
Oxidising properties	not applicable
punto di infiammabilità	<0°C
densità relativa (peso specifico)	0,900

SECTION 10. Stability and reactivity

10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

ACETONE

Decomposes under the effect of heat.

2-BUTOXYETHANOL

Decomposes under the effect of heat.

DIACETONE ALCOHOL

Decomposes at temperatures above 90°C/194°F.

BUTAN-1-OL

Talken Color Srl	Revision nr. 13
	Dated 12/12/2023
A0031 - TINTE RAL	Printed on 16/01/2024
	Page n. 10/21 Replaced revision:12 (Dated: 24/01/2023)
Attacks various types of plastic materials.	
N-BUTYL ACETATE	
Decomposes on contact with: water.	
2-METHOXY-1-METHYLETHYL ACETATE	
Stable in normal conditions of use and storage.	
With the air it may slowly develop peroxides that explode with an increase in temperature.	
TOLUENE	
Avoid exposure to: light.	
10.2. Chemical stability	
The product is stable in normal conditions of use and storage.	
10.3. Possibility of hazardous reactions	
No hazardous reactions are foreseeable in normal conditions of use and storage.	
ACETONE	
Risk of explosion on contact with: bromine trifluoride,fluorine dioxide,hydrogen peroxide,nitrosyl chloride,2-met perchlorate.May react dangerously with: potassium tert-butoxide,alkaline hydroxides,bromine,bromoform,isop trioxide,chromyl chloride,nitric acid,chloroform,peroxymonosulphuric acid,phosphoryl oxychloride,chromosu agents,strong reducing agents.Develops flammable gas on contact with: nitrosyl perchlorate.	rene,sodium,sulphur dioxide,chromium
2-BUTOXYETHANOL	
May react dangerously with: aluminium, oxidising agents. Forms peroxides with: air.	
DIACETONE ALCOHOL	
Risk of explosion on contact with: air, sources of heat. May react dangerously with: alkaline metals, amines, oxidising	agents,acids.
XYLENE	
Stable in normal conditions of use and storage.Reacts violently with: strong oxidants,strong acids,nitric acid,per with: air.	chlorates.May form explosive mixtures
BUTAN-1-OL	

BUTAN-1-OL

Reacts violently developing heat on contact with: aluminium,strong oxidising agents,strong reducing agents,hydrochloric acid. Forms explosive mixtures with: air.

N-BUTYL ACETATE

Risk of explosion on contact with: strong oxidising agents. May react dangerously with: alkaline hydroxides, potassium tert-butoxide. Forms explosive mixtures with: air.

Talken Color Srl	Revision nr. 13 Dated 12/12/2023
A0031 - TINTE RAL	Printed on 16/01/2024
	Page n. 11/21 Replaced revision:12 (Dated: 24/01/2023)
	Replaced 1945011.12 (Dated. 24/01/2023)
ETHYLBENZENE	
Reacts violently with: strong oxidants.Attacks various types of plastic materials.May form explosive mixtures with: a	sir
2-METHOXY-1-METHYLETHYL ACETATE	AII .
May react violently with: oxidising substances,strong acids,alkaline metals.	
TOLUENE	
Risk of explosion on contact with: fuming sulphuric acid,nitric acid,silver perchlorate,nitrogen dioxide,non- nitrocompounds.May form explosive mixtures with: air.May react dangerously with: strong oxidising agents,strong	metal halogenates,acetic acid,organic acids,sulphur.
10.4. Conditions to avoid	
Avoid overheating.	
ACETONE	
Avoid exposure to: sources of heat, naked flames.	
2-BUTOXYETHANOL	
Avoid exposure to: sources of heat, naked flames.	
DIACETONE ALCOHOL	
Avoid exposure to: light, sources of heat, naked flames.	
BUTAN-1-OL	
Avoid exposure to: sources of heat,naked flames.	
N-BUTYL ACETATE	
Avoid exposure to: moisture, sources of heat, naked flames.	
10.5. Incompatible materials	
Strong reducing or oxidising agents, strong acids or alkalis, hot material.	
ACETONE	
Incompatible with: acids,oxidising substances.	
N-BUTYL ACETATE	
Incompatible with: water, nitrates, strong oxidants, acids, alkalis, zinc.	
2-METHOXY-1-METHYLETHYL ACETATE	
Incompatible with: oxidising substances, strong acids, alkaline metals.	

Talken Color Srl	Revision nr. 13
	Dated 12/12/2023
A0031 - TINTE RAL	Printed on 16/01/2024
	Page n. 12/21
	Replaced revision:12 (Dated: 24/01/2023)

10.6. Hazardous decomposition products

ACETONE

May develop: ketenes, irritant substances.

2-BUTOXYETHANOL

May develop: hydrogen.

ETHYLBENZENE

May develop: methane,styrene,hydrogen,ethane.

SECTION 11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.

It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Metabolism, toxicokinetics, mechanism of action and other information

2-METHOXY-1-METHYLETHYL ACETATE The main route of entry is the skin, whereas the respiratory route is less important due to the low vapour pressure of the product.

Information on likely routes of exposure

DIACETONE ALCOHOL WORKERS: inhalation; contact with the skin.

XYLENE WORKERS: inhalation; contact with the skin. POPULATION: ingestion of contaminated food or water; inhalation of ambient air.

N-BUTYL ACETATE WORKERS: inhalation; contact with the skin.

ETHYLBENZENE WORKERS: inhalation; contact with the skin. POPULATION: ingestion of contaminated food or water; contact with the skin of products containing the substance.

2-METHOXY-1-METHYLETHYL ACETATE WORKERS: inhalation; contact with the skin.

TOLUENE WORKERS: inhalation; contact with the skin. POPULATION: ingestion of contaminated food or water; inhalation of ambient air; contact with the skin of products containing the substance.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

DIACETONE ALCOHOL

Acute toxicity causes irritation of the eyes, nose and throat in humans at 100 ppm (476 mg/kg) and pulmonary disorders at 400 ppm. No chronic effects on humans have been reported. The substance may have a depressive effect on the respiratory centres and cause death from respiratory failure.

	Replaced revision:12 (Dated: 24/01/2023)

Toxic effect on the central nervous system (encephalopathy); irritating for the skin, conjunctiva, cornea and respiratory apparatus.

N-BUTYL ACETATE

In humans, the substance's vapours cause irritation of the eyes and nose. In the event of repeated exposure, skin irritation, dermatitis (dryness and cracking of the skin) and keratitis appear.

ETHYLBENZENE

As the counterparts of benzene, may have an acute effect on the central nervous system, with depression, narcosis, often preceded by dizziness and associated with headache (Ispesl). Is irritating for skin, conjunctiva and respiratory tract.

2-METHOXY-1-METHYLETHYL ACETATE

Above 100 ppm causes irritation of the eye, nose and oropharynx mucous membranes. At 1000 ppm, disturbance of equilibrium and severe eye irritation can be noticed. Clinical and biological examinations carried out on exposed volunteers revealed no anomalies. Acetate produces greater skin and eye irritation with direct contact. No chronic effects on humans have been reported (INCR, 2010).

TOLUENE

Toxic effect on the central and peripheral nervous system with encephalopathy and polyneuritis; irritating for the skin, conjunctiva, cornea and respiratory apparatus.

Interactive effects

XYLENE

Intake of alcohol interferes with the metabolism of the substance, inhibiting it. Ethanol consumption (0.8 g/kg) before a 4-hour exposure to xylene vapours (145 and 280 ppm) causes a 50% reduction in the excretion of methyl hippuric acid, whereas the concentration of xylenes in the blood increases approx. 1.5-2 times. At the same time there is an increase in the secondary side effects of the ethanol. The metabolism of the xylenes is increased by phenobarbital and 3-methyl-colantrene type enzyme inducers. Aspirin and xylenes mutually inhibit their conjugation with the glycine, which results in a decrease in urinary excretion of methyl hippuric acid. Other industrial products can interfere with the metabolism of xylenes.

N-BUTYL ACETATE

A case of acute intoxication been reported involving a 33 year old worker while cleaning a tank with a preparation containing xylenes, butyl acetate and ethylene glycol acetate. The person had irritation of the conjunctiva and upper respiratory tract, drowsiness and motor coordination disorders, which disappeared within 5 hours. The symptoms are attributed to poisoning by mixed xylenes and butyl acetate, with a possible synergistic effect responsible for the neurological effects. Cases of vacuolar keratitis are reported in workers exposed to a mixture of butyl acetate and isobutanol vapours, but with uncertainty concerning the responsibility of a particular solvent (INRC, 2011).

TOLUENE

Certain drugs and other industrial products can interfere with the metabolism of the toluene. <u>ACUTE TOXICITY</u> ATE (Inhalation - mists / powders) of the > 5 mg/l

REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

STOT - SINGLE EXPOSURE

May cause drowsiness or dizziness

STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

ASPIRATION HAZARD

Excluded because the aerosol does not allow the accumulation of a significant amount of product in the mouth

11.2. Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

SECTION 12. Ecological information

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

12.1. Toxicity

12.4. Mobility in soil

Information not available

12.5. Results of PBT and vPvB assessment

On the basis of available data, the product does not contain any PBT or vPvB in percentage \geq than 0,1%.

12.6. Endocrine disrupting properties

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

12.7. Other adverse effects

Information not available

SECTION 13. Disposal considerations

13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

Regulation (EU) 2019/1148 - on the marketing and use of explosives precursors	
Regulated explosives precursor The acquisition, introduction, possession or use of that regulated explosives precursor by members of abligations as set out in Article 9. Ill suspicious transactions and significant disappearances and thefts must be reported to the relevant nation	
Substances in Candidate List (Art. 59 REACH)	
In the basis of available data, the product does not contain any SVHC in percentage \geq than 0,1%.	
Substances subject to authorisation (Annex XIV REACH)	
lone	
Substances subject to exportation reporting pursuant to Regulation (EU) 649/2012:	
lone	
Substances subject to the Rotterdam Convention:	
lone	
Substances subject to the Stockholm Convention:	
lone	
lealthcare controls	
Vorkers exposed to this chemical agent must not undergo health checks, provided that available risk-asses vorkers' health and safety are modest and that the 98/24/EC directive is respected.	ssment data prove that the risks related to the
15.2. Chemical safety assessment	
A chemical safety assessment has not been performed for the preparation/for the substances indicated in se	ection 3.

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

Aerosol 1	Aerosol, category 1
Aerosol 3	Aerosol, category 3
Flam. Liq. 2	Flammable liquid, category 2
Flam. Liq. 3	Flammable liquid, category 3
Repr. 2	Reproductive toxicity, category 2
Acute Tox. 3	Acute toxicity, category 3
Acute Tox. 4	Acute toxicity, category 4
Asp. Tox. 1	Aspiration hazard, category 1
STOT RE 2	Specific target organ toxicity - repeated exposure, category 2
Eye Dam. 1	Serious eye damage, category 1
Eye Irrit. 2	Eye irritation, category 2
