	Safety Data	a Sheet	
Accordi		Regulation (EU) 2020/878	
SECTION 1. Identification of the sul	ostance/mixture ar	nd of the company/und	lertaking
1.1. Product identifier Code:	A0201		
Product name	BIANCO SUPERCOPR		
Chemical name and synonym			
UFI :	AE00-G066-A008-Y62I		
1.2. Relevant identified uses of the substance or Intended use BIANCO SUPERCO	mixture and uses advise PRENTE PER MURI E CA		
1.3. Details of the supplier of the safety data she	et		
Name	Talken Color Srl		
Full address	via Don Milani 15		
District and Country	20025 Legnano (Mi) Italia		
	Tel. 0331/579100		
	Fax 0331/579372		
e-mail address of the competent person	1 ax 0331/3/3312		
	ta ani a a Gtallian a alan i		
responsible for the Safety Data Sheet	tecnico@talkencolor.i	t	
1.4. Emergency telephone number For urgent inquiries refer to	CENTRO ANTIVELEN	dl Milano-Niguarda Tel 02661	01029
		.	
SECTION 2. Hazards identification			
2.1. Classification of the substance or mixture			
The product is closelfied as bezordaus pursuant to	the provisions out forth in	(EC) Pagulation 1272/2008 (C	ID) (and subsequent amondments and
The product is classified as hazardous pursuant to supplements). The product thus requires a safety data			
Any additional information concerning the risks for hea			
Hazard classification and indication:			
Aerosol, category 1	H222	Extremely flammable as	
	H229	Pressurised container: r	
Eye irritation, category 2	H319	Causes serious eye irrit	
Specific target organ toxicity - single exposure, cate	gory 3 H336	May cause drowsiness	or dizziness.
2.2. Label elements			
Hazard labelling pursuant to EC Regulation 1272/2008	3 (CLP) and subsequent ar	mendments and supplements.	

	Talken Color Srl	Revision nr. 6 Dated 23/10/2024
	A0201 - BIANCO SUPERCOPRENTE	Printed on 18/02/2025

		Replaced revision:5 (Dated: 02/02/2023)
Hazard pictograms:		
	^	
JHR .		
	•	
•	•	
Signal words:	Danger	
Hazard statements:		
H222	Extremely flammable aerosol.	
H229	Pressurised container: may burst if heated.	
H319	Causes serious eye irritation.	
H336	May cause drowsiness or dizziness.	
EUH066	Repeated exposure may cause skin dryness or cracking.	
EUH211	Warning! Hazardous respirable droplets may be formed when sprayed. Do not	ot breathe spray or mist.
Precautionary		
statements: P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition so	purces. No smoking.
P251	Do not pierce or burn, even after use.	
P410+P412	Protect from sunlight. Do no expose to temperatures exceeding 50°C / 122°F	
P501	Dispose of contents in different containers for steel	
P102	Keep out of reach of children.	
P101	If medical advice is needed, have product container or label at hand.	
P211	Do not spray on an open flame or other ignition source.	
a <i>i i</i>		
Contains:	ACETONE PROPAN-2-OL	
	BUTAN-1-OL	
2.3. Other hazards		
On the basis of availa	ble data, the product does not contain any PBT or vPvB in percentage \geq than 0,1%.	
The product does not	contain substances with endocrine disrupting properties in concentration $\geq 0.1\%$.	
SECTION 3. C	omposition/information on ingredients	
3.2. Mixtures

The full wording of hazard (H) phrases is given in section 16 of the sheet.

The product is an aerosol containing propellants. For the purposes of calculation of the health hazards, propellants are not considered (unless they have health hazards). The percentages indicated are inclusive of the propellants.

Percentage of propellants: 45,10 %

SECTION 4. First aid measures

4.1. Description of first aid measures

In case of doubt or in the presence of symptoms contact a doctor and show him this document.

In case of more severe symptoms, ask for immediate medical aid.

EYES: Remove, if present, contact lenses if the situation allows you to do so easily. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. Get medical advice/attention.

SKIN: Take off contaminated clothing. Wash immediately and thoroughly with running water (and soap if possible). Get medical advice. Avoid further contact with contaminated clothing.

INGESTION: Do not induce vomiting unless explicitly authorised by a doctor. Do not give anything by mouth to an unconscious person. Get medical advice/attention.

INHALATION: Remove victim to fresh air, away from the accident scene. In the event of respiratory symptoms (coughing, wheezing, breathing difficulty, asthma) keep the victim in a comfortable position for breathing. If necessary administer oxygen. If the subject stops breathing, administer artificial respiration. Get medical advice/attention.

Rescuer protection

It is good practice for rescuers lending support to a person who has been exposed to a chemical substance or to a mixture to wear personal protective equipment. The nature of such protection depends on the hazard level of the substance or mixture, on the type of exposure and on the extent of the contamination. In the absence of other more specific indications, use of disposable gloves in the event of possible contact with body fluids is recommended. For the type of PPE suitable for the characteristics of the substance or mixture, see section 8.

4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

DELAYED EFFECTS: Based on the information currently available, there are no known cases of delayed effects following exposure to this product.

A0201 - BIANCO SUPERCOPRENTE

Revision nr. 6

Dated 23/10/2024

Printed on 18/02/2025 Page n. 5/23

Replaced revision:5 (Dated: 02/02/2023)

4.3. Indication of any immediate medical attention and special treatment needed

Call a POISON CENTRE / doctor / . . . if you feel unwell.

Means to have available in the workplace for specific and immediate treatment

Running water for skin and eye wash.

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE If overheated, aerosol cans can deform, explode and be propelled considerable distances. Put a protective helmet on before approaching the fire. Do not breathe combustion products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site. Send away individuals who are not suitably equipped. Wear protective gloves / protective clothing / eye protection / face protection.

6.2. Environmental precautions

Do not disperse in the environment.

6.3. Methods and material for containment and cleaning up

Use inert absorbent material to soak up leaked product. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

A0201 - BIANCO SUPERCOPRENTE

Revision nr. 6

Dated 23/10/2024 Printed on 18/02/2025

Page n. 6/23

Replaced revision:5 (Dated: 02/02/2023)

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Avoid bunching of electrostatic charges. Do not spray on flames or incandescent bodies. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Do not eat, drink or smoke during use. Do not breathe spray.

7.2. Conditions for safe storage, including any incompatibilities

Store in a place where adequate ventilation is ensured, away from direct sunlight at a temperature below 50°C / 122°F, away from any combustion sources.

2-METHOXY-1-METHYLETHYL ACETATE

Store in an inert atmosphere, sheletered from moisture because it hydrolises easily.

7.3. Specific end use(s)

Information not available

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

8.2. Exposure controls

A0201 - BIANCO SUPERCOPRENTE

Revision nr. 6

Dated 23/10/2024 Printed on 18/02/2025

Page n. 9/23

Replaced revision:5 (Dated: 02/02/2023)

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

HAND PROTECTION None required.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

EYE PROTECTION

Wear airtight protective goggles (see standard EN ISO 16321).

RESPIRATORY PROTECTION

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. Use a mask with a type AX filter combined with a type P filter should be worn (see standard EN 14387).

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

SECTION 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

Properties	Value	Information
Appearance	aerosol

Revision nr. 6

Dated 23/10/2024 Printed on 18/02/2025

Page n. 11/23

Replaced revision:5 (Dated: 02/02/2023)

Avoid exposure to: light.

10.2. Chemical stability

The product is stable in normal conditions of use and storage.

10.3. Possibility of hazardous reactions

No hazardous reactions are foreseeable in normal conditions of use and storage.

ACETONE

Risk of explosion on contact with: bromine trifluoride,fluorine dioxide,hydrogen peroxide,nitrosyl chloride,2-methyl-1,3 butadiene,nitromethane,nitrosyl perchlorate.May react dangerously with: potassium tert-butoxide,alkaline hydroxides,bromine,bromoform,isoprene,sodium,sulphur dioxide,chromium trioxide,chromyl chloride,nitric acid,chloroform,peroxymonosulphuric acid,phosphoryl oxychloride,chromosulphuric acid,fluorine,strong oxidising agents,strong reducing agents.Develops flammable gas on contact with: nitrosyl perchlorate.

2-BUTOXYETHANOL

May react dangerously with: aluminium, oxidising agents. Forms peroxides with: air.

DIACETONE ALCOHOL

Risk of explosion on contact with: air, sources of heat. May react dangerously with: alkaline metals, amines, oxidising agents, acids.

BUTAN-1-OL

Reacts violently developing heat on contact with: aluminium,strong oxidising agents,strong reducing agents,hydrochloric acid. Forms explosive mixtures with: air.

XYLENE

Stable in normal conditions of use and storage. Reacts violently with: strong oxidants, strong acids, nitric acid, perchlorates. May form explosive mixtures with: air.

ETHYLBENZENE

Reacts violently with: strong oxidants.Attacks various types of plastic materials.May form explosive mixtures with: air.

2-METHOXY-1-METHYLETHYL ACETATE

May react violently with: oxidising substances, strong acids, alkaline metals.

N-BUTYL ACETATE

Risk of explosion on contact with: strong oxidising agents. May react dangerously with: alkaline hydroxides, potassium tert-butoxide. Forms explosive mixtures with: air.

TOLUENE

Risk of explosion on contact with: fuming sulphuric acid,nitric acid,silver perchlorate,nitrogen dioxide,non-metal halogenates,acetic acid,organic nitrocompounds. May form explosive mixtures with: air. May react dangerously with: strong oxidising agents, strong acids, sulphur.

10.4. Conditions to avoid

Avoid exposure to: sources of heat, naked flames.	
DIACETONE ALCOHOL	
Avoid exposure to: light,sources of heat,naked flames.	
BUTAN-1-OL	
Avoid exposure to: sources of heat, naked flames.	
N-BUTYL ACETATE	
Avoid exposure to: moisture, sources of heat, naked flames.	
0.5. Incompatible materials	
Strong reducing or oxidising agents, strong acids or alkalis, hot material.	
ACETONE	
ncompatible with: acids,oxidising substances.	
2-METHOXY-1-METHYLETHYL ACETATE	
ncompatible with: oxidising substances, strong acids, alkaline metals.	
N-BUTYL ACETATE	
ncompatible with: water, nitrates, strong oxidants, acids, alkalis, zinc.	
0.6. Hazardous decomposition products	
ACETONE	
May develop: ketenes,irritant substances.	
2-BUTOXYETHANOL	
/lay develop: hydrogen.	
THYLBENZENE

SECTION 11. Toxicological information	
n the absence of experimental data for the product itself, health hazards are evaluated according to the	a properties of the substances it contains using
the criteria specified in the applicable regulation for classification. t is therefore necessary to take into account the concentration of the individual hazardous substances indiffects of exposure to the product.	
1.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008	
letabolism, toxicokinetics, mechanism of action and other information	
-METHOXY-1-METHYLETHYL ACETATE he main route of entry is the skin, whereas the respiratory route is less important due to the low vapour p	pressure of the product.
nformation on likely routes of exposure	
Varning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist.	
DIACETONE ALCOHOL VORKERS: inhalation; contact with the skin.	
XYLENE WORKERS: inhalation; contact with the skin. POPULATION: ingestion of contaminated food or water; inhalation of ambient air.	
ETHYLBENZENE NORKERS: inhalation; contact with the skin. POPULATION: ingestion of contaminated food or water; contact with the skin of products containing the s	ubstance.
2-METHOXY-1-METHYLETHYL ACETATE VORKERS: inhalation; contact with the skin.	
N-BUTYL ACETATE NORKERS: inhalation; contact with the skin.	
FOLUENE NORKERS: inhalation; contact with the skin. POPULATION: ingestion of contaminated food or water; inhalation of ambient air; contact with the skin of	products containing the substance.
Delayed and immediate effects as well as chronic effects from short and long-term exposure	
DIACETONE ALCOHOL Acute toxicity causes irritation of the eyes, nose and throat in humans at 100 ppm (476 mg/kg) and pulm on humans have been reported. The substance may have a depressive effect on the respiratory centres a	
KYLENE For the central nervous system (encephalopathy); irritating for the skin, conjunctiva, cornea an	d respiratory apparatus.
ETHYLBENZENE As the counterparts of benzene, may have an acute effect on the central nervous system, with depress associated with headache (IspesI). Is irritating for skin, conjunctiva and respiratory tract.	sion, narcosis, often preceded by dizziness a
P-METHOXY-1-METHYLETHYL ACETATE bove 100 ppm causes irritation of the eye, nose and oropharynx mucous membranes. At 1000 ppm, dis an be noticed. Clinical and biological examinations carried out on exposed volunteers revealed no and ritation with direct contact. No chronic effects on humans have been reported (INCR, 2010).	
I-BUTYL ACETATE

REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

STOT - SINGLE EXPOSURE

May cause drowsiness or dizziness

STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

ASPIRATION HAZARD

Excluded because the aerosol does not allow the accumulation of a significant amount of product in the mouth

11.2. Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

SECTION 12. Ecological information

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

12.1. Toxicity

Information not available

12.2. Persistence and degradability

12.4. Mobility in soil

Information not available

12.5. Results of PBT and vPvB assessment

On the basis of available data, the product does not contain any PBT or vPvB in percentage \geq than 0,1%.

12.6. Endocrine disrupting properties

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

12.7. Other adverse effects

Information not available

SECTION 13. Disposal considerations

13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

The management of waste arising from the use or dispersal of this product must be organised in accordance with occupational safety regulations. See section 8 for possible need for PPE.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

SECTION 14. Transport information

14.1. UN number or ID number

ADR / RID, IMDG, IATA: UN 1950

14.2. UN proper shipping name

ADR / RID:	AEROSOLS

Point Point	75 46a	NONYLPHENOL, BRANCHED AND LINEAR, ETHOXYLATED (with average molecular weight ≤ 1 540 g/mol)	
Regulation (EU) 2019/1148	- on the marketing and use of	explosives precursors	
	on the marketing and doe of		
obligations as set out in Artic	n, possession or use of that cle 9.	t regulated explosives precursor by members of the g and thefts must be reported to the relevant national conta	
Substances in Candidate Lis	<u>st (Art. 59 REACH)</u>		
On the basis of available da	ta, the product does not contai	in any SVHC in percentage ≥ than 0,1%.	
Substances subject to autho	prisation (Annex XIV REACH)		
None			
Substances subject to expor	rtation reporting pursuant to Re	egulation (EU) 649/2012:	
None			
Substances subject to the R	otterdam Convention:		
None			
Substances subject to the Stockholm Convention:			
None			
Healthcare controls			
Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.			
15.2. Chemical safety assessment			
A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.			
SECTION 16. Other information			
Text of hazard (H) indication	ns mentioned in section 2-3 of t	the sheet:	
Aerosol 1	Aerosol, category 1		
Aerosol 3	Aerosol, category 3		

Flam. Liq. 2

Flam. Liq. 3

Flammable liquid, category 2

Flammable liquid, category 3

Revision nr. 6

Dated 23/10/2024 Printed on 18/02/2025

Page n. 21/23

Replaced revision:5 (Dated: 02/02/2023)

Carc. 2	Carcinogenicity, category 2
Repr. 2	Reproductive toxicity, category 2
Acute Tox. 3	Acute toxicity, category 3
Acute Tox. 4	Acute toxicity, category 4
Asp. Tox. 1	Aspiration hazard, category 1
STOT RE 2	Specific target organ toxicity - repeated exposure, category 2
Eye Dam. 1	Serious eye damage, category 1
Eye Irrit. 2	Eye irritation, category 2
Skin Irrit. 2	Skin irritation, category 2
STOT SE 3	Specific target organ toxicity - single exposure, category 3
Aquatic Chronic 3	Hazardous to the aquatic environment, chronic toxicity, category 3
H222	Extremely flammable aerosol.
H229	Pressurised container: may burst if heated.
H225	Highly flammable liquid and vapour.
H226	Flammable liquid and vapour.
H351	Suspected of causing cancer.
H361d	Suspected of damaging the unborn child.
H331	Toxic if inhaled.
H302	Harmful if swallowed.
H312	Harmful in contact with skin.
H332	Harmful if inhaled.
H304	May be fatal if swallowed and enters airways.
H373	May cause damage to organs through prolonged or repeated exposure.
H318	Causes serious eye damage.
H319	Causes serious eye irritation.
H315	Causes skin irritation.
H335	May cause respiratory irritation.
H336	May cause drowsiness or dizziness.
H412	Harmful to aquatic life with long lasting effects.
EUH066	Repeated exposure may cause skin dryness or cracking.
EUH211	Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist.

- ADR: European Agreement concerning the carriage of Dangerous goods by Road
- ATE: Acute Toxicity Estimate
- CAS: Chemical Abstract Service Number
- CE50: Effective concentration (required to induce a 50% effect)
- CE: Identifier in ESIS (European archive of existing substances)
- CLP: Regulation (EC) 1272/2008 DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labeling of chemicals
- IATA DGR: International Air Transport Association Dangerous Goods Regulation
- IC50: Immobilization Concentration 50% IMDG: International Maritime Code for dangerous goods
- IMO: International Maritime Organization
- INDEX: Identifier in Annex VI of CLP LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%
- OEL: Occupational Exposure Level PBT: Persistent, bioaccumulative and toxic
